RED DIAMOND

GROW BEYOND ORGANIC

ABOUT US

We are Innovators, World Changers, Scientists, Next Generation Guardians of the Earth! We believe in the right to Nutrient Rich Foods, and our mission is to bring new life and vitality to the soils across the world!

Implementing a natural balance in everything we do, by converting organic waste materials into biologic soil treatment and crop protection solutions, enables us to improve organic waste management, food and nutrition security, and most of all, build resilience against climate change through our holistic and regenerative approach.

LIKE A DIAMOND IN THE ROUGH, A CLIMATE CHANGE SOLUTION HAS ALWAYS BEEN BENEATH OUR FEET!

PRODUCTS

THE NEXT STAGE BEYOND ORGANIC

The key to farming in line with nature is to recognize the true power of beneficial soil organisms. Our products allow you to realize this power and help your plants express their full genetic potential.

SUPER SEAWEED PLANT FOOD

A BioStimulant made from sargassum seaweed that won't only super charge plant and root growth, but will also boost your plants natural immune system, nutrient intake and overall appearance.

LIQUID SUNSHINE BIO FERTILIZER

This plant based biofertilizer used during the blooming stage of fruiting crops is great for maximizing overall crop yield of high value crops such as tomatoes, kale and carrots.
